TE 3000-AVR Breaker

Break free from the hassles of pneumatic breakers and other electric tools with the new Hilti TE 3000-AVR

Features & benefits

- Over 50 foot-pounds of impact energy results in outstanding demolition performance and productivity
- SR brushless motor delivers tremendous demolition performance while keeping weight down
- Active Vibration Reduction achieves the lowest vibration in its class
- TE-H Polygon Self-Sharpening Chisels provide strong breaking power and stick less in concrete
- New brushless SR motor eliminates need to replace carbon brushes and provides longer intervals between service
- Active Cooling System for the motor, electronics, and hammering mechanism keeps the tool and its casing cool for added durability
- Three-chamber sealing principle means longer lasting life with less breakdowns
- Power Conditioning System protects the motor against power surges and drains
- Supported by Hilti Lifetime Service which includes the 2 year No-Cost coverage

Applications

- Medium- to heavy-duty demolition of concrete slabs and foundations
- Concrete removal for rebar connections and utility connections
- Asphalt and road patchwork
- Penetrations for pipes, electrical boxes, HVAC, beams, etc
- Digging and tamping for earthwork
